

**Williams Std Body Cabinet Dimensions**  
**Do not re-distribute without consent from Greg Butcher (mameman)**  
**NOT FOR COMMERCIAL USE**

Would advise notching both the sides and front/back where the legs bolt rather than trying to drill the corners after and risk splitting the wood.

**\*Note**  
The inside edges of the cabinet front and rear faces should be cut at 45 degrees to meet with the front and back panels

**Williams Widebody Cabinet Dimensions**

**\*Note**  
The inside edges of the cabinet front and rear panels should be cut at 45 degrees to meet with the cabinet side panels
